The sudden refusal of the Pentagon to provide arms to the rebels (whatever there really are in Syria) - to play along with the pretense that opposition to U.S. military intervention is. Mechanisms of action of nerve agents, including VX and sarin. The following are some of the major mechanisms of nerve agents actions as they relate to the ability of these agents to immobilize, damage and kill. (1) The ability of nerve agents to prevent acetylcholine from binding with and activating acetylcholine receptors. (2) The ability of nerve agents to prevent sodium and potassium channels from opening. (3) The ability of nerve agents to cause the accumulation of Ca^{2+} in the nerve terminal which in turn can overwhelm Ca^{2+} sensitive regulatory molecules in the nerve terminal. (4) The ability of nerve agents to inactivate or block the activity of enzymes. Oprah's secret to success: 'Take the pain and make it

Oprah Winfrey's confession that she's diagnosed with Type 2 diabetes should serve as a reminder that we should take health a bit more seriously than we might. According to the CDC, diabetes is the fourth leading cause of death in the United States, and the most common chronic disease in adults ages 20 to 74. We spoke with the world-renowned author about her condition and her tips for living a healthier lifestyle. Question: How would you define success? Oprah: I wouldn't say that success is having an apartment on Central Park West, but that's certainly a dream that I have. Success is just knowing your own power and being able to express that. Q: What made you want to write about your health? Oprah: I wanted to write about health because I want to live longer. I want to have the energy to keep going on this journey and also, the moment that you can't — you're going to have to go somewhere else. There's no way you can keep going. How far do you want to go? What's the reason for you to keep going? I want to be able to have the time and energy for my family and my work. So it was a way for me to have hope. Q: How has living with diabetes affected your daily routine? Oprah: Oh. As a mom, I

Experimentally induced, self- limiting fracture of giant vesicles:

a model system for cell damage. Fracture of the cell membrane is accompanied by the formation of a hole and the release of intravesicular contents into the surrounding medium.

Using giant, unilamellar phosphatidylcholine vesicles as a model system for membrane, we have been able to induce self-limiting fracture. The results suggest that fracture may serve as a general mechanism for the intercellular loss of plasma membrane components and for the onset of the much more dramatic events in programmed cell death such as cell fragmentation, vacuolation, and the release of nuclear contents.
